

Marti Olsasz

SOFTWARE ENGINEER

ABOUT ME

Software Engineer with years of experience in full-stack development and team collaboration.

Currently specializing in Embedded Systems and Firmware, combining a passion for low-level programming with a background in building robust software.

SKILLS

- C, C++, Bash, Linux
- AVR, ISR, PWM, ADC
- UART, I2C, SPI
- Git, Docker
- Agile, Scrum
- JS, TS, Node.js, Angular
- Godot, Three.js

LANGUAGES

- Catalan: Native
- Spanish: Native
- English: Professional

WORK EXPERIENCE

Tech Lead & Software Engineer

Stack Overflight | Oct 2024 - Jan 2026

- Lead a technical team of 6 developers
- Fullstack development (Angular, .NET)
- Code reviews and best practices
- Primary technical liaison with clients

Software Developer

Business Insights | Sep 2021 - Jun 2023

- Fullstack development (Angular, React, .NET)

Freelance Software Developer

Self-Employed | Sep 2020 - May 2022

- Designed and implemented web applications
- Managed the full software development lifecycle
- Vue, JS, Node.js, Express, MongoDB

Programming & robotics instructor

Codelearn | Apr 2018 - Jun 2022

- Programming concepts, algorithmic thinking

EDUCATION

42 Paris | 2026

Embedded Systems & PCB Design

- Bare-metal C: Registers, bitwise ops, interrupts, and protocols (UART, I2C, SPI)
- PCB Design: Schematic and layout development using KiCad.

42 Barcelona | 2023 - Present

Software Engineering Program

- Low-level, Algorithms, Memory Management.
- Peer-to-peer engineering program emphasizing problem-solving in C and C++ within Linux environments.

Skylab Coders Academy | 2020

Fullstack Web Development Bootcamp

- Intensive program focused on modern web architectures and software development
- JS/TS, React, Node.js
